PICKETT ONE STEP™ AHEAD ROD CUTTER WINDROWER

THE PREMIER BEAN CUTTING SYSTEM IN THE INDUSTRY

The design of the One Step™ Ahead will allow pulling and windrowing of row crops or solid seeded crops in one operation with virtually no loss.

RECOVERY SAVINGS

If you can improve your cutting and windrowing techniques enough to recover up to 2 bags per acre, this chart tells what your extra revenue would be. Just look for the number of acres of beans you grow and the average price you expect.

Per Bag	2 bags per acre savings @						
	Acres						
	100	200	300	400	500	600	700
\$12	\$2400	\$4800	\$7200	\$9600	\$12000	\$14400	\$16800
15	3000	6000	9000	12000	15000	18000	21000
17	3400	6800	10200	13600	17000	20400	23800
19	3800	7600	11400	15200	19000	22800	26600
21	4200	8400	12600	16800	21000	25200	29400
23	4600	9200	13800	18400	23000	27600	32200
25	5000	10000	15000	20000	25000	30000	35000
27	5400	10800	16200	21600	27000	32400	37800

Pulling beans or peas with the ONE STEP™ AHEAD mounted up front allows optimum visibility & control while harvesting your crop.

Mounted on each side of the machine are heavy duty scissor type gauge wheels with dividers. They provide precise rod depth control & smooth vine separation.

ONE STEP™ AHEAD REQUIREMENTS

- Front assist tractor 120 + HP
- Front 3 point hitch with 10,000 lb. lift capacity
- Hydraulics 20 gal. & 2300 lbs. pressure

ONE STEP UNITS AVAILABLE

		Approx. Wt.
A 6030	6 Row, 30" Semi End	4950
A 8022	8 Row, 22" Semi End	5250
A 8030	8 Row, 30" Semi End	7500
